

# How to activate Data Manager on Safaricom

## Option 1: Using USSD Code \*544#

1. Dial \*544# on your Safaricom line.
2. From the menu that appears, select "Balance and Tips." Typically option 13
3. Next, choose "My Data Manager" from the available options. Typically option 2
4. Select "Activate" to turn on the Data Manager. Typically option 1
5. Wait for a confirmation message.

## Option 2: Using USSD Code \*100#

1. Dial \*100# on your Safaricom line.
2. From the main menu, select option 4, labeled "My Account."
3. Choose "Airtime and Data Usage" from the subsequent menu. Typically option 4
4. Look for and select "Data Manager" from the list of available services. Typically Option 1
5. Tap on "Activate" to enable the feature. Typically option 1
6. You'll receive a confirmation message stating that Data Manager is now active.

## Option 3: Using the My Safaricom App

1. Launch the My Safaricom App on your smartphone.
2. Navigate to the "Data, Calls, SMS & Airtime" section.
3. Find and tap on "View & Manage Data Usage."
5. From the options presented, select "My Data Manager."
6. Tap on the "Activate" button.
7. A confirmation prompt will appear, asking if you want to activate Data Manager for your phone number.
8. Confirm by tapping "Activate Confirmation."
9. Wait for a confirmation message.
