

# SHOULD I BUY A HYBRID CAR

## CONSIDER A HYBRID CAR IF:

- You do a lot of city driving with frequent stops
- You have a long commute in stop-and-go traffic
- You're looking to reduce your carbon footprint
- Fuel prices in your area are high or volatile
- You can afford the higher upfront cost
- You're comfortable with the idea of eventually replacing a battery pack
- You have access to mechanics familiar with hybrid technology
- You're satisfied with moderate performance and prioritize efficiency
- You're interested in the instant torque provided by electric motors

## STICK WITH A GAS CAR IF:

- Fuel prices in your area are consistently low
- Your budget is tight and you need a lower initial purchase price
- You're not planning to keep the car long enough to realize fuel savings
- You require high performance or towing capacity
- You enjoy the sound and feel of a traditional engine
