

# MAJOR DISEASES IN BULB ONION FARMING

## Onion Downy Mildew

Onion Downy Mildew is a fungal disease that thrives in cool, humid conditions with poor drainage.

## Rust

Rust is a fungal disease favored by high humidity, high temperatures, and dense plant populations.

## Pink Root

Similar to nutrient deficiencies or stress from extremely dry conditions

## Neck Rot

Neck Rot is a storage disease caused by a fungus that enters onions through wounds or cracks in the fleshy neck part of the bulb.

## Purple Blotch

Purple Blotch is caused by a fungus and can severely affect onion foliage and bulbs.
